BACK-END DEVELOPER

**Are you a back-end fanatic, want to work with a lively product and want to optimize everything?
Then we are looking for you!**

Introducing us

We are a start-up and a community platform for street athletes and artists – also known as urban sports & culture – around the world. These urban sports and cultures, such as freerunning, are becoming increasingly popular, partly because skateboarding, breakdance, BMX, surfing and others have been added to the Olympics. In recent years, this has also awakened brands and (local) governments.

CityLegends offers a digital world where urban athletes find the best spots, events, peers and challenge others to climb the ranks and leave a legacy. When, with whom and where they want to. CityLegends is also more than 'just an app'. We offer brands and governments creative activation campaigns to connect their city or brand more strongly to our community. Together with our partners, we work towards our goal: to become the most engaged urban community worldwide.

Working at CityLegends gives you the opportunity to greatly expand your network and work with brands, governments and our partners LUMO Labs (international start-up programme) and the international agency imec.istarts (supports innovative EU companies). You will be building the growth of CityLegends with a fanatical team, founders and advisors. Are you ready to conquer the world?

'We're never done'

You are*

You are able, and willing to design and develop new features independently, in addition, you are not shy of setting up the platform where the code eventually runs. Communicates well with the app developers to deliver a backend that perfectly matches the app. u don't take hierarchy too seriously and dare to speak your mind. You have a drive to continuously develop and learn new languages / techniques. Above all, you can communicate well and are not averse to a party once in a while! ;-)

*This vacancy has been written by a developer, not by a recruiter.

You have:

— 3+ years experience as a backend engineer
— Devops mindset
— Experience with architecture and design
— Experience with our techstack (Go, Nodejs, GraphQL, Postgresql)
— Experience working in an Agile/Scrum environment
— Experience within a modern cloud/microservice environment
— Experience with Google cloud is a plus

What do we offer?

We offer the chance to work in a dynamic environment with global potential. You will be part of a close-knit urban team with a strong drive to make an impact.

— Fulltime availability;
— Working on the most legendary target group, urban sports & culture;
— Great projects with big cities, multinational brands and techniques such as Augmented Reality, video, NFT's and avatars;
— Great growth opportunities - sky is the limit;
— Market conform rate;
— We meet 2 days at urban hotspot Area51 and at High Tech Campus (both Eindhoven);
— Possibly to work fully remote.

Further, we're always curious to needs you might have. We would love to know and discuss them.

Are you the Flutter Developer we are looking for?

Are you interested? Then send your CV and a motivation to our CTO, Thijmen Verkerk (thijmen@citylegends.nl) and Jimmy Hermans, CEO of CityLegends: Jimmy@citylegends.nl;
